

24" and 30" Commercial/Industrial Blow Molded Brine Tanks

Clack now offers both 24" and 30" round blow molded brine tanks. The introduction of the 30" diameter tank makes it the largest blow molded brine tank for commercial/ industrial applications. Like the 24" round tank, the 30" tank is molded of high density polyethylene for exceptional stress-crack resistant properties. These tanks are ideal for industrial and commercial use and the 30" tank feature heavy wall thickness for in-creased durability.

Injection molded grids are available for both 24" and 30" tanks and use 1½" schedule 40 PVC pipe for leg supports. The legs can be cut to any length for easy grid height adjustment. A precut leg kit for the 24" grid is also available, giving it an overall grid height of 10¼".

(HDPE Plastic Grids Sold Separately.)

Accessories Order Information:
