

3½" & 4" Slotted Brine Wells and Caps

BRINE WELLS – Clack’s 3½” and 4” brine wells are extruded from high impact polystyrene for long life and durability. Both the 3½” and 4” wells are slotted, with die punched slots that are clean and uniform. Our wells provide the fit and finish needed for your complete assembly. Custom brine well lengths are also available, please consult the factory for details. A press fit cap can be installed in the top and bottom of the well without the use of solvents, giving you the flexibility to assemble units to your customer’s requirements. Please call and ask about our complete line of salt grids, brine valves, and components for both the 3½” and 4” brine wells.

3½" SLOTTED BRINE WELLS	
Order #	Description
H1031-28S	3½" x 28" slotted
H1031-29S	3½" x 29" slotted
